

AHMED ÖZDOĞAN

SOFTWARE DEVELOPER
(FULL STACK | PYTHON, JS, TS,
REACT, DJANGO, EXPRESS.JS)

PERSONAL PROFILE

Full-Stack Web Developer specialized in Python, Django, Flask, and JavaScript/TypeScript (React, Express.js) with a strong command of GraphQL and RESTful APIs. Proficient in designing data models and working with SQL and NoSQL databases (PostgreSQL, MySQL, MongoDB). Experienced in deploying applications using Docker, Vercel, Render, Railway, and working with server tools like Gunicorn and WhiteNoise. Passionate about creating scalable, maintainable, and user-centric web applications with clean architecture, good testing, and collaborative agile practices.

SKILLS AND EXPERTISE

• Front-End Development:

React, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma, Canva

• Back-End Development:

Python, Django, Flask / Node.js, Express.js

• Database Management:

MySQL, PostgreSQL, MongoDB

• API Development & Integration:

RESTful APIs, GraphQL

• Version Control & Collaboration:

Git, GitHub

• Deployment & DevOps:

Docker, Railway, Render, Vercel, Gunicorn, WhiteNoise

• Testing & API Tools:

Django Test Framework, Jest, Insomnia

EDUCATIONAL HISTORY

English Language And Literature

Cankaya University / 2017-2021

- Gained strong analytical and critical thinking skills through close study of literature, theory, and historical texts. Developed the ability to interpret complex information, write clearly, and analyze patterns – strengths now applied in data analysis and full-stack web development.

Meta Front-End Developer

- | | |
|---------------------------------------|--------------------------------|
| • Intro. to the Front-End Development | • Advanced React |
| • Programming with JavaScript | • Principles of UX/UI Design |
| • Version Control | • Front-End Developer Capstone |
| • HTML and CSS in depth | • Coding Interview Preparation |
| • React Basics | |

Meta Back-End Developer

- | | |
|--|--------------------------------|
| • Intro. to Back-End Development | • Django Web Framework |
| • Programming in Python | • APIs |
| • Version Control | • The Full Stack |
| • Introduction to Databases for Back-End Development | • Back-End Developer Capstone |
| | • Coding Interview Preparation |

IBM Full-Stack JavaScript Developer

- | | |
|--|--|
| • Intro. to Software Eng. | • Intro. to Containers w/ Docker, Kubernetes & OpenShift |
| • Intro. to HTML, CSS & JS | • App Dev. using Microservices & Serverless |
| • Getting Started with Git & GitHub | • Node.js & MongoDB: Back-End DB Apps |
| • JS Programming Essentials | • JS Full-Stack Capstone Project |
| • Front-End Dev. with React | • Software Dev. Career Guide & Interview Prep |
| • Back-End Dev. with Node.js & Express | |
| • Get Started with Cloud Native, DevOps, Agile & NoSQL | |

WORK EXPERIENCE

[CLICK HERE →](#)

■ Find Services

Software Developer - Full Stack | 2025/09- Present

- Worked on an AI-integrated CV builder website, developing both the front-end and back-end features. Built dynamic and responsive user interfaces using React (TSX) and Tailwind CSS, ensuring a clean, modern design. Implemented custom hooks, reusable components, and animations to enhance user experience. Integrated Supabase for PostgreSQL database management, authentication, and real-time data synchronization, and configured Firebase for secure hosting, analytics, and cloud storage. Collaborated on AI integration features such as resume generation and optimization, while maintaining code quality with Git version control and best practices.

■ STEM for Others

Software Developer - Full Stack | 2025/06- 2025/09

- Volunteered with STEM for Others, contributing to curriculum and web app development using TypeScript & Next.js, gained experience in Agile teamwork, GitHub collaboration, and large-scale codebases while learning best practices from senior developers.

■ Python Instructor

Instructor | 2025/05- 2025/08

- Worked as a Python Instructor for a short-term program, teaching children with special needs the basics of programming in a fun, engaging, and accessible way. Designed interactive lessons around core Python concepts (variables, loops, conditionals) and adapted teaching methods to different learning abilities, fostering creativity and problem-solving skills

■ Sunshine International Company

English Teacher | 2021/09- Present

- Taught students aged 3–40 in international schools, adapting lessons to diverse learning levels and multicultural environments. Collaborated with educators to design tailored lesson plans, strengthening skills in communication, adaptability, and problem-solving. Gained expertise in breaking down complex concepts into clear, structured explanations, a strength now applied in development and teamwork.

■ Dervisogullari Expertise Company

Reporter | 2016/01 - 2020-01

- Worked nearly four years as an Insurance Damage Reporter, documenting vehicle conditions, estimating repair costs, and preparing structured reports for insurers and courts, strengthened skills in data collection, reporting, workflow tracking, and compliance, directly applicable to building reliable, data-driven web applications. Developed precise documentation skills now applied in debugging and writing clear technical reports.

PROJECTS

[CLICK HERE →](#)

- **Bakery** – **Django 5, DRF, JS**– full-stack e-commerce app with Stripe checkout, cart persistence, and role-based access. Built a scalable REST API to handle orders, payments, and user workflows.
- **SchedEye.com** – **Flask, Bootstrap 5, MySQL** – scheduling & payment system for teachers with secure authentication, CRUD lesson management, bulk scheduling, and admin dashboards.
- **Restaurant** – **Django 5, DRF, SQLite** – responsive web app with RESTful APIs for menu/reservations, role-based views, and ES6 frontend. Designed to demonstrate backend–frontend integration.
- **MindMaze** – **React** – Interactive trivia quiz game with dynamic questions, sound effects, and strategic power-ups for an engaging user experience.
- **Giftlink**– **MERN Stack** – Full-stack gift and e-commerce app with JWT authentication, secure REST APIs, and a responsive Bootstrap frontend.
